## Looking for

If we are doomed to be inundated by AlphaGo's, I'd rather get wet firsthand. I'm not a genius, but fast enough learner: I learned philosophy, politics and law, and taught myself computer, economics and finance. Now, I want to learn machine learning, data science, cloud computing and – hopefully – biotechnology as much as, and as fast as possible. I want to be soaked by them. I am looking for part-time works, remote work-type but, if you urge, can manage 4-hour meeting once every week. Companies outside Korea are welcome.

## Worked as

07/01 - Now **Foreign attorney** [law firms](#)  
Worked at various law firms drafting contracts, performing lawsuits, negotiating and settling other various disputes (mostly license-related) for companies, startups and individuals. Love working on complex financial transactions, startup financing, technology licensing and generally things that are complicated enough to pique my curiosity

01/00 - Now **Odd works** [lawfully.kr](#)  
Love writing books, blogging, translating (prefably Korean to English although equally competent the way around), tutoring, and playing with computers (especially Mac and Linux) and programs

## Learned at

1998 - 2001 **Juris Doctor** [Georgetown University Law Center](#)  
1994 - 1997 **MA in Political Science** [Yonsei University](#)  
1985 - 1989 **BA in Philosophy** [Yonsei University](#)

## Earned certifications

01/2017 **AWS Certified Solutions Architect - Associate** [AWS](#)  
12/2015 **Attorney at law** [Washington State Bar Association](#)

## Earned honors & awards

2004 **Asia's Leading Lawyer in Securitization and Structured Finance** [AsiaLaw](#)  
2003 **Asia's Leading Lawyer in Capital Markets** [AsiaLaw](#)

**Now trying**  
Biotechnology  
Cloud architecting  
Machine learning

## Published books

I love writing and translating books. I translated 2 books and authored 3, all in Korean. I want to try writing in English, if opportunity arises.

파생상품 (2011) *Translation of Satyajit Das's "Traders, Guns and Money"*

머니해킹 (2009)

**OTL English (2008)**

따라해보는 실전해킹 (1998)

밴디트 퀸 (1995) *Translation of Mala Sen's "Bandit Queen"*

## Curious, then read on

Law is a very fine profession if you have a curious mind. Sometimes, though, I am attracted to *domain knowledges* that are beyond what is required of providing legal service. I love learning things and playing with gadgets.

I'm not in the market for a full-time job, mind you, but I don't mind moonlighting on things related to computers (cloud and big data, for example), bio-things or something new like fintech or internet-of-things.

You may also try my blogs at lawfully.kr, 15-year-old rambling and another at hyunkim.lawyer, a new one that I plan to devote on laws and law technology and legal industry generally. I tried but had little luck with English blog, but I will try again.

Also, I love meeting people as long as not too much flirting is required (I'm an introvert) and there's something new to pick up. So, contact me if you've got something to distract me from whatever I'm doing right now.
